- Accessories: color box, manual, Type C USB cable

100% pure essential oils pressurized by an air pump and atomized into a fine mist

Operating Principle

Rainbow car diffuser compresses air into turbulent gas with special pump principles and utilizes negative pressure to suck essential oil into a mist cavity. Turbulent gas smashes the essential oil into the inner wall of the cavity to further break the essential oil droplets, forming molecular clusters of 2-5 microns and diffusing them into the air. The mist of essential oil can be seen suspended into the air and rapidly spread to the whole space along with the air flow.

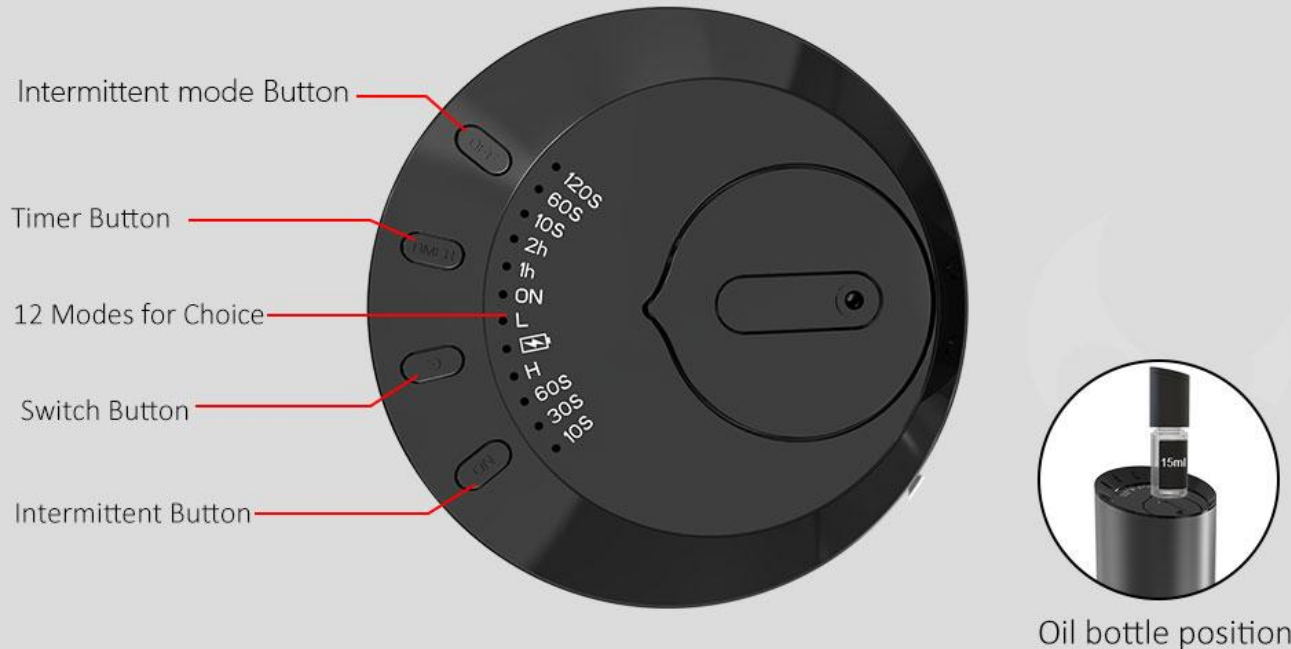

- ✓ Waterless, pure essential oil
- ✓ Keep essential oils 100% natural
- ✓ Built-in battery 2400 mAh
- ✓ One-button operation on/off
- ✓ Long working hours and ultra-quiet
- ✓ Multiple applications, from car office to home
